Our latest innovation, the COOL teak deck series, redefines natural beauty and functionality. Enjoy barefoot comfort with this durable, aesthetically pleasing teak deck solution.

01

PRODUCT USAGE

This product represents our company's experience of many years. Our aim is to make this product exceptionally resistant to extreme wear. Apart from the fact that the product has got natural look, it does not require yearly maintenance or oiling and sanding. This material is resistant against marine environment, i. e. against sea water and extreme UV radiation. Stains can be easily removed and the surface is anti-slipping under all weather conditions.

ADVANTAGES

a quality alternative to genuine
supplied in various colours

efficiently dampens noise

has an anti-slip surface

does not lose colour even under
the influence of UV radiation and
does not get old as genuine wood
does

stains can be easily removed

a durable, maintenance-free
material that is sea and weather
resistant

fast and efficient assembly

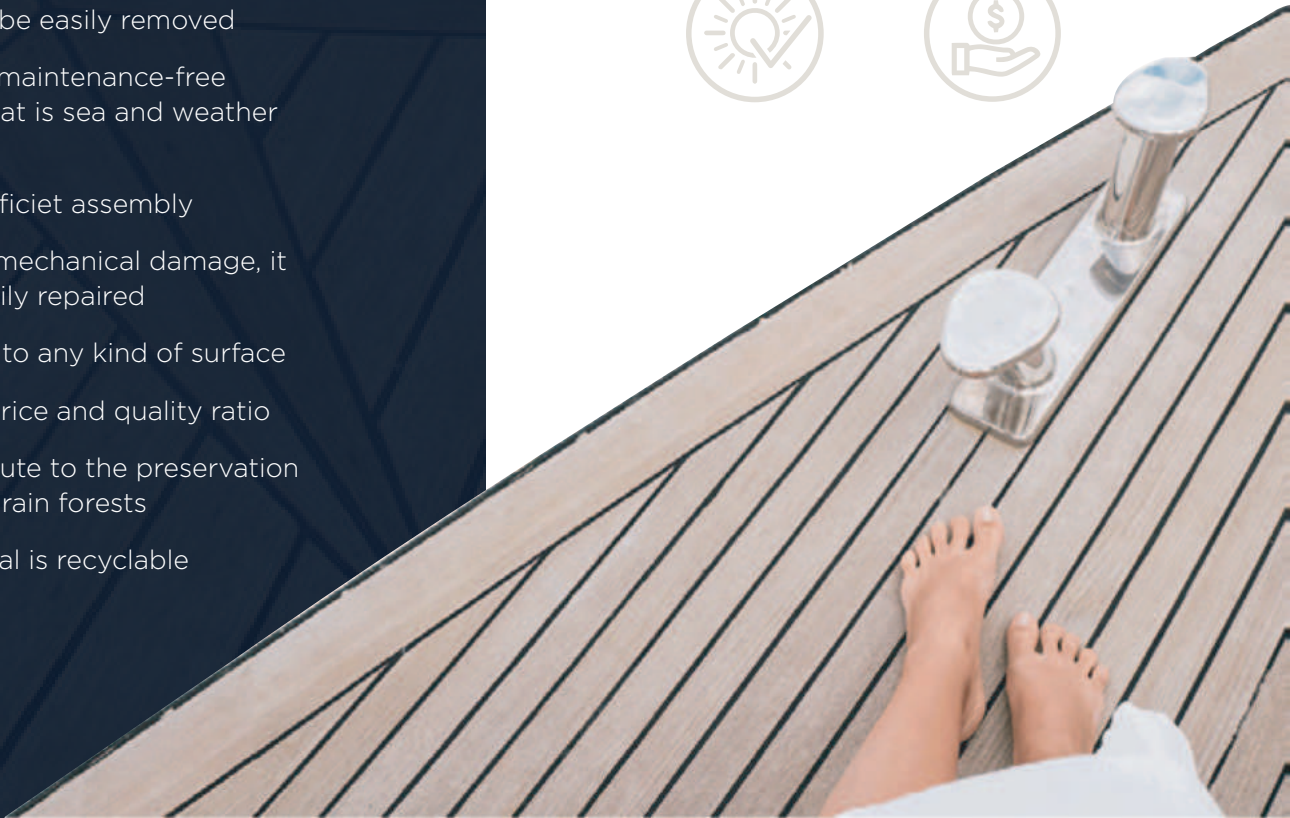

in case of mechanical damage, it
can be easily repaired

applicable to any kind of surface

excellent price and quality ratio

we contribute to the preservation
of tropical rain forests

this material is recyclable

EVOLUTION

OUR SERVICES

Based on the customer's request, we assemble the desired shape, which our customer only needs to glue on site.

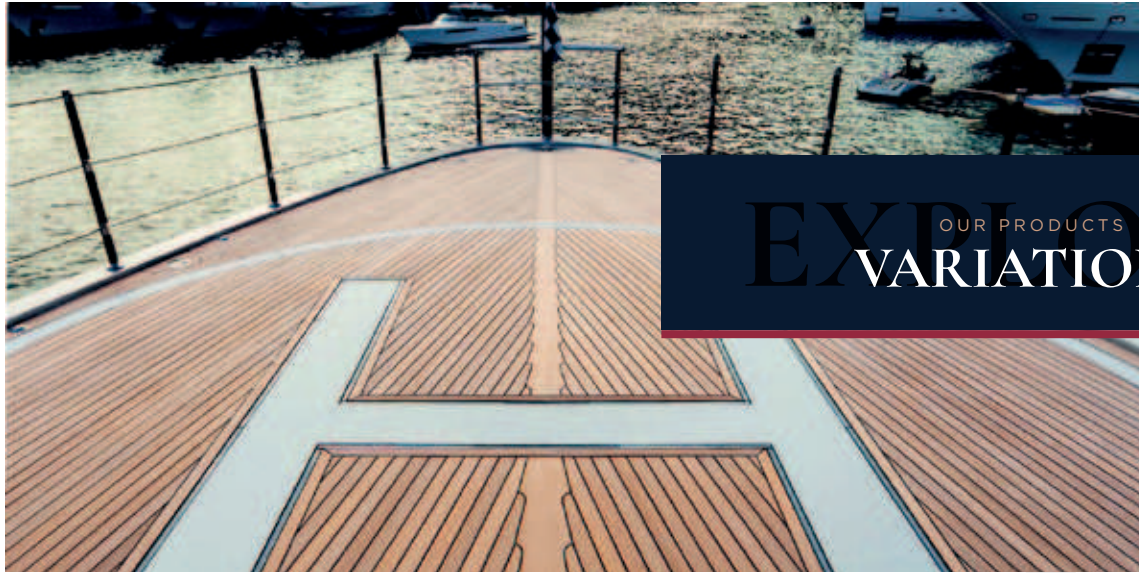

For our partners, it is enough to prepare a 2-dimensional plan. The design can be created with an online designer or even during on-site consultation.

We offer unique solutions such as company logos and ship names, which are engraved into the cover like an inlay.

According to the customer wishes, the color of the inlay and the grout can be chosen from the RAL scale. Metallic or gold colors are also available upon request.
